

Preheat Remote

FST LLC, 2021

REGAL PRO 4G

High reliability cellular preheater switch for use with text capable phone with a 1.7 KW load capacity.

FEATURES

- The PRO's 1700 Watt resistive and 1/3 HP inductive capacity are also suitable for non-aviation applications. Either outlet can carry the entire 1.7 KW load or multiple loads can be split between the outlets, not to exceed 1700 Watts total.
- The unit outlets accept NEMA 5-15 plugs.
- Remote operations use the proven control system. A free and user-friendly iPhone app is available, or the unit can be controlled by any text capable cell phone.
- The outlets can be turned ON and OFF by the app or text message. It can also be turned on for selected ON periods by text message. Commands are automatically confirmed, or users can interrogate the unit.
- The unit can be programmed to turn on at a specific time in the next 24 hours and stay ON for a user selected time period. Activation and shut off are confirmed by text message or interrogation.
- A resident program can be setup to turn the outlet ON for a user selected ON period when the unit's is called. Only authorized phone numbers can activate the program.
- Power restorations are confirmed by text message.
- Security provided by password and authorized user list.
- The Unit is delivered with an active phone number and at least 80 days and an airtime balance of at least \$8.00.
- Cell service is provided with a pay-as-you-go account on the AirVoice wireless (AT&T) system. This is an inexpensive cell service to keep your unit active or there is a no-hassle 360-day CMS service managed by FST LLC. This service is available for \$80.00 per 360-days.
